

PECKING ORDER

Set the party sequence before any party contest resolves.

CAMPAIGN ROUND

RESOLVE FIRST

PERSISTENT UNTIL CHANGED

01

FIRST PARTY

02

SECOND

03

THIRD

04

FOURTH

05

FIFTH

06

LAST PARTY

AUTOMATIC AUCTION

**No opener.
No opening bid.**

Use ordinary covered counterbids. Equal Clout cancels, including zero.

A

EXECUTE OPERATIVES

Lowest Clout → Highest Clout

Highest acts last. Every operative swaps one adjacent pair; choose the pair when it executes.

B

REVOLVING DOOR

Most Clout → Least Clout

Transfer in the normal rank direction. The lowest bid loops to the highest.

C

PARTY ORDER TOKENS

Cut six 44 mm tokens. Place one in every numbered board position. These tokens show resolution order, not district Support.

ONE OPERATIVE / ONE ADJACENT SWAP

Move the tokens, not the position labels.

Resolve a multi-operative bid one token at a time. After each swap, use the updated order before choosing the next adjacent pair.
